Summary

Full Stack Developer who has shipped GymFlow, a live SaaS platform built for independent gym owners in India, handling member lifecycle management, automated WhatsApp renewal reminders, and revenue tracking. Specialize in Next.js 14 (App Router), TypeScript, PostgreSQL, and Prisma. Experienced in building scalable REST APIs, designing multi-tenant database schemas, and deploying production applications on Vercel and Neon. Currently adding Docker, Redis, and payment gateway integration to deepen backend competency.

Education

B.Tech in Computer Science & Engineering

Oct 2021 – May 2025

Scope College of Engineering, Bhopal

- **CGPA:** 7.4/10
- **Relevant Coursework:** Data Structures & Algorithms, Web Development, Database Systems

Experience

Operations & Automation Intern | Alliance Meditech Pvt Ltd.

Sep 25 - Mar 26

- Built an Excel VBA automation system that processed invoices end-to-end, eliminating ~6 hours/week of manual data entry across the operations team.
- Designed secure and controlled templates, improving data consistency and reducing processing delays.

Projects

GymFlow | Gym Management SaaS

Live

- Architected a multi-tenant SaaS platform for gym owners to manage 200+ member profiles, subscriptions, and payment renewals with real-time status tracking.
- Built automated WhatsApp notification system using WhatsApp Business API, cutting membership lapse rate by enabling proactive renewal reminders 5/3/1 day before expiry.
- Engineered a revenue dashboard surfacing MRR, churn rate, and renewal forecasts, giving gym owners financial visibility previously unavailable without manual spreadsheets.
- Deployed on Vercel with Neon PostgreSQL, handling cold-start latency via a custom withDB() retry wrapper ensuring <2s response times under real-world load.
- Technologies: Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Tailwind CSS, REST APIs, Cloudinary

RentFlow | Property Management SaaS

Live

- Built multi-tenant property management platform with room-level rent cycle tracking, supporting landlords managing 10–50+ units without spreadsheets.
- Engineered automated rent collection reminders and payment status dashboard, giving landlords real-time visibility into overdue and upcoming payments.
- Implemented tenant onboarding flow with room assignment, rent amount configuration, and payment history - reducing landlord setup time to under 5 minutes per property.
- Technologies: Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, shadcn/ui, REST APIs, Vercel

Technical Skills

Languages: JavaScript, TypeScript, Python.

Frameworks & Libraries React.js, Next.js, Node.js, Express.js, Tailwind CSS, ShadCn, Zod

Databases: MongoDB, MySQL, PostgreSQL

APIs & Authentication REST APIs, JWT, Resend API, Gemini API

Tools & Platforms: Git/Github, VS Code, Postman, Vercel, Netlify
